ORDER DESK / GUIDED STATES

Keep the next action clear.

The queue, session and editor explain what the operator can do.

Queue loading

Waiting for this result.

Loading queue…

Refresh stays disabled while fetching.

No matching orders

Page 1 – 0 matching orders

No orders on this page.

Change the filters or return to an earlier page.

Request failure

The API could not be reached.

Your selection stays available.

Start the API, then click Refresh queue.

Viewer session

Current session: viewer

This session cannot change fulfillment.

Read the orders; open an operator session to edit.

Outdated editor

A newer version is available.

Reload before saving.

Do not overwrite a record you have not reviewed.

Invalid fulfillment

Payment is still pending.

The service rejects shipping this order.

Keep the draft and explain why it was rejected.

ORDER DESK / CLIENT CHANGE A07

Set priority. Keep every result.

Review selected orders across pages, apply one priority and retain the orders that need attention.

BEFORE APPLYING

Bulk order priority

2 selected records reviewed

Review selected priorities

OD-1041: normal · version 1

OD-1042: normal · version 1

Apply high priority

The request uses the versions captured during review.

AFTER THE RESPONSE

Batch results

OD-1041 accepted

Priority: high · version 2

OD-1042 rejected

Payment pending: ready orders only.

CURRENT WORKSPACE

Selection

1

orders selected across searches

The service validates readiness when you prepare a preview.

Clear selection

The accepted order leaves the selection. The rejected order and any new selections remain. Review again before the next attempt.

ORDER DESK / CLIENT CHANGE A07

Protect a recoverable attempt.

A draft, a pending request and its eventual result belong to a specific workspace.

Selection changed

A new order was selected after review. Review the current selection before applying.

Review selected priorities

Whole request failed

Keep every selected ID. Explain the request error so the operator can recover.

Apply high priority

Viewer session

The selected orders may be reviewed, but this session cannot change their priority.

Apply high priority

Workspace changed

Ignore the old batch result. Keep the newly opened workspace and its selection intact.
